SIEGE

INTRODUCING THE GEL BAIT INSECTICIDE

SIEGE is a gel bait insecticide that is effective for use in sensitive areas (such as bedroom and kitchen) because of its baiting method.

SIEGE is different from other insecticide because it was specially designed for use with the XACTADOSE Precision Baiting System. With **SIEGE**, PCOs can control pests for up to 3 months by baiting them in the toughest to reach areas, and save time with fewer callbacks, while controlling costs and product.

HOW DOES IT WORK?

SIEGE cartridges fit into the effective patented XACTADOSE Precision Baiting System gun. It is then applied to areas that pests pass through. When pests encounter the palatable **SIEGE**, they devour it. The active chemical hydramethylnon then affects the metabolic system, killing roaches within 24 to 48 hours.

Please note that the insects which feed on **SIEGE** bait do not die immediately. Instead, they return to their harborage carrying the active ingredient with them where other roaches will ingest **SIEGE** by feeding on their dead bodies and faeces.

American Cockroach
(*Periplaneta americana*)

German Cockroach
(*Blattella germanica*)

COST-EFFECTIVE AND EFFICIENT

SIEGE has the key benefits you look for:

- **Precise delivery**
Using **SIEGE** with the XACTADOSE gun means precise measured doses, easy loading and application, no site preparation and savings of time, material and money. Just set the dose and pull the trigger!!
- **Palatable**
Roaches simply can't resist **SIEGE**, which means they are sure to ingest a lethal dose.
- **Fast-acting with high mortality**
In 24 to 48 hours, **SIEGE** will achieve high mortality rate.
- **Safety**
SIEGE features Class IV pesticide and can easily be placed out of the reach of children and pets. **SIEGE** can be used in all types of residential, commercial and industrial sites.
- **Long-lasting and cost-effective**
Its stable formulation keeps **SIEGE** palatable for a longer time, and it won't evaporate.
- **Benefits PCO**
SIEGE will enhance customer opinions because of fewer callbacks and effective control with no mess.
Precise delivery of SIEGE offers good control and ease of use.
