Seclira® SG Insecticide

Non-staining*, odourless, broad spectrum, general insect control product for indoor and outdoor use.

Seclira® SG represents the latest significant innovation in general insecticide technology. **Seclira® SG** is the industry's first non-staining, odourless, broad spectrum, non-repellent general insect control product for indoor and outdoor use. **Seclira® SG** has been formulated into unique Soluble Granules which dissolve totally clear resulting in a non-staining solution which remains in suspension ensuring uniformity and consistency of application.

Seclira® SG is formulated with a novel, non-repellent active ingredient, which provides fast knockdown characteristics exhibits BASF Genuine Transfer Effect technology resulting in unmatched performance. **Seclira® SG** is approved for use both inside and outside and controls a broad spectrum of pests including house flies, cockroaches, and ants.

Footnote:

***Seclira® SG** will not stain surfaces that water alone does not stain. Dirt on surfaces may result in runoff and staining. Where staining is a concern – a test application is recommended.

Non-Repellent

- Undetectable to insects.
- Does not repel or flush out insects causing unfortunate sightings by customers.
- Does not scatter insects and spread the infestation.
- Able to use with baits for quicker pest control results.

Genuine Transfer Effect®

- Transfer effect on social insects such as cockroaches and ants.
- Due to it's non-repellency, insects pick up **Seclira® SG** unknowingly and spread to others.

Fast Knockdown On House Flies

House Flies- % knockdown and % mortality (direct spray)

SC Product

Dosage Rate & Application

 Spot Treatment

LOCATION	PESTS	DOSAGE PER LITRE	SPRAY VOLUME PER 1M ²
External and internal areas associated with institutions, commercial, storerooms hospitals, public buildings, offices, private houses and others.	Cockroaches (<i>Blattella germanica</i>)	6.5g	50ml
	House Flies (<i>Musca domestica</i>)	5.0g	40ml
	Ants (<i>Monomorium pharaonis</i>)	2.6g	40ml

APPLICATION

SECLIRA® SG can be applied with a handheld or knapsack sprayer or truck-mounted tank sprayer for control of public health pests.

SECLIRA® SG is a soluble granule which is easily mixed and diluted in water and applied as a residual spray. Fill spray tank to ½ full of water. Add the required amount of **SECLIRA® SG** to the spray tank and disperse using mechanical or hydraulic agitation. Add remaining water required for finished dilution.

SECLIRA® SG should be applied by a licensed pest controller only.
